Honeywell

Trust is built in the details.
We're starting with our Serial Numbers.

As an installer of Solar Modules, your customers trust you. And we understand all too well that you put your name and reputation on the line when you recommend us.

Which is why we are introducing an industry first – an **Online Quality Control Check** of every Honeywell Solar Module you install; a wonderful tool to help your customers trust both you and us.

How does this work:

Every Honeywell Solar Module has its own unique 16-digit Serial Number.

Your customers can type this Serial Number into the 'Quality Check' Section of www.honeywell-solar.com

And instantly they are provided access to all the necessary details about the Solar Modules they have just purchased from you:

• Exact production date and test time

• DC-power Wp output

• Extra Wp power (positive tolerance)

• Linear output (25 year power output warranty)

• Short circuit current I_{sc}

• Open circuit voltage V_{oc}

• Max. power current I_{mpp}

• Max. power voltage V_{mpp}

• Fill Factor FF

These facts will greatly reassure them of the choices they have made: a quality installer and a quality product.

All of the above features combined with the **Honeywell 20-year product warranty** and **25-year power output warranty**, should definitely help you convince your customers choose Honeywell Solar Modules.

Useful information about the Serial numbers:

• *Serial Number stickers are visible on the side of each module after opening the packaging (the original Serial Numbers will remain on the back of each module).*

• *The stickers should be removed and stuck on the 'Customer Handout' document.*

• *Do not forget to hand the document to your customers post installation.*

Useful information about filling the Serial Numbers on www.honeywell-solar.com:

• *Your customers can fill the Serial Numbers in the Quality Control Check box:*

• *One Serial Number: E.g. HWP66021508A0148*

• *Multiple Serial Numbers should be separated by commas: E.g. HWP66021508A0148, HWP66021508A0356*

• *A range of Serial Numbers should be separated by a hyphen: E.g. HWP66021508A0148 – HWP66021508A0150*

• *Click on the button "Check my product >" to see the results of the first module on top and the list of selected module Serial Numbers will appear at the bottom.*
